CHILL OUT!

11 September
2013

First for Survey together with Carlson Software cordially invites you to join us on 11th September 2013 for what promises to be an interesting, informative and importantly, entertaining day in the snow.

September is maybe a little early to be thinking about snow but a day at the Manchester Chill Factor[®] will give you a taste of the more positive aspects of the white stuff when, for a part of the day at least, you will be able to sample Tubing and The Luge at this exciting venue.

No previous experience of snow sports required, just a thirst for fun!

The business of the day - demonstrations and hands on experience of the latest survey data collection, civil engineering and mining software from CARLSON together with Survey Instruments from both GEOMAX and SOKKIA plus the latest Laser Scanner technology from FARO will be on show. Our experienced representatives will be on hand to advise and show you the advantages of these latest innovations in survey and what's new in our industry.

The fun of the day - this event will give you the opportunity to get a taste of the unique Chill Factor[®] Experience with events especially chosen for you by the First for Survey Team.

Venue: Chill Factor[®], Trafford Quays Leisure Village, Trafford Way, Manchester, M41 7JA
Just off the M60 west of Manchester
